## **Architect, Transitional**

### **Catherine Truman Architects**

To Catherine Truman and her team, every project is a new beginning. As each client has a distinct palette of preferences and needs, and each site has its own history, attributes, and restrictions, each home Truman creates is uniquely tailored to suit those conditions. She and her team of 12 are versatile and experienced: the firm is adept at complex historic renovations, LEED certified new houses, sparkling city high-rises, and every type of building in between. They are interested in whole house-design: they want the interior and exterior to not only co-exist, but to complement one another and they relish designing all the details—from the window trim to the kitchen cabinetry to the chimney cap—specifically for *you*.
